CANDIDATE 1		42%
CANDIDATE 4		20%
CANDIDATE 7		25%
CANDIDATE 8		13%

STEP 3 - Efficient & Reliable Results Delivered 'Live'

STEP 2 - VOTE FORMS SCANNED

Votes Processed Fast - Efficient & Reliable Results Delivered 'Live'

Election Any Time (EAT) is a software solution developed by Datacap for the specific purpose of voting and polling use. EAT offers a wide range of functionality to the users, ranging from creating your own voting forms to obtaining complex results. EAT aims to deliver results as efficient and reliable as possible because we know that those final figures can be crucial in any election.

Customers have full control of how votes can be used such as their individual values, different voting stages and how many voting agendas. EAT offers a wide range of flexibility to suit your needs, beyond a simple "Yes or No" voting method.

A conventional basic election scheme that requires logging in votes by hand can take over 8hrs; using our EAT software and scanners, processing time can be cut to 2hrs. With this kind of efficiency, results can be delivered directly 'Live' to your audience without delay.

Whether you have a small group's decision to make or planning to establish a large election campaign, EAT offers you reliable and fast results in minimal time.
